UniPHY

A revolutionary approach to networking and collaboration in the physical sciences

Researchers now have a tool for communicating with colleagues and identifying potential collaborators. **UniPHY** is a first-of-its-kind professional social networking platform for physical scientists that is pre-populated with profiles of individual researchers based on their publication history. **Register today @uniphy.org!**

UniPHY enables physical scientists to connect with over 300,000 colleagues from more than 100 countries. They will discover the research each of these individuals has conducted and follow a web of connections showing each co-author with whom the investigator has worked. **UniPHY** reveals with whom each of these co-authors has collaborated, as well.
